

Discovery Teamwork

Duration: 1 or 2 days

Enable teams to achieve their collective goals. Focus on the issues and challenges that are most critical to the team's success.

Discovery Teamwork is ideal if you want to:

- Confront problems, inspire success and unlock potential
- Create space for open and honest dialogue
- Develop action plans that enable your team to be the best it can be

How it works?

Discovery Teamwork is a simple and accessible framework that allows you to explore your teams' Defining Moments, both good and bad.

Based on the Insights Discovery colour energy model, the Discovery Teamwork's four-quadrant approach enables us to highlight the most pressing and important issues for the team's development. In consultation with you, we can diagnose problems and opportunities, prevent failure and dramatically increase your chances of success. Our unique approach is supported by our world-leading diagnostics, which explore the team's preferences and capabilities.

What it can lead to?

Discovery Teamwork can lead to improved relationships within your team, immediately impacting your bottom line.

Adopting this accessible, dynamic and proven model, your team will be able to confront problems head on in a positive, pragmatic and engaging way.

It is this combination of powerful expertise, our leading-edge diagnostics and the simple and accessible model which leads our customers to describe Discovery Teamwork as transformational for their business.

You can select your style of team building workshop from a selection of:

- **Social and Pleasure** - pure fun events designed to get people interacting and talking.
- **Business, Social and Pleasure** - fun and semi serious events where different departments or businesses need to create stronger partnerships.
- **Business and Challenge** - the subject focuses on psychological teambuilding where people are working more closely in demanding situations.

Whichever option you choose we set the foundation based on an understanding of personality types. Based on that understanding we look at how the team members interact and then use experiential challenges to build practical understanding about high performance teamwork.
